

Mor Meir – Full stack Developer

0548027131 | 123agmor@gmail.com | [LinkedIn](#) | [GitHub](#)

As a Full stack developer, I excel in developing complex systems utilizing a diverse range of technologies. I have experience in Frontend and Backend development, and I thrive in collaborative team environments. I love to learn, acquire new skills, and meet new challenges.

Employment History:

Full stack Developer at Brew (on behalf of Misterbit) 2022-2023

- I've been responsible for building the new front-end for the client, which includes complex dashboards, charts, user-flows, analytics and advanced components.
- I've performed frontend and backend tasks.
- As part of the optimization process, I've worked on creating dynamic components, storybook, writing tests, and contributing to architectural changes in both the frontend and backend.
- I've collaborated with various positions within the organization, including product managers, designers, customer success, the CTO, and others.

Full stack Developer and Coding instructor at Misterbit 2022

- I've been part of developing a product from its initial stages, encompassing both frontend and backend development. This involved creating complex components, integrating video functionality, implementing recording features, email services, SMS services, and more.
- I've collaborated with team members, the CTO, and the designer.
- As an instructor, I have experience teaching a wide range of code, from vanilla JavaScript to advanced frameworks. I provide students with personalized and group code reviews, offering valuable feedback on their code and studied materials.

Education:

Full stack Development Bootcamp at Coding Academy 2021

I graduated with honors from an intensive coding Bootcamp that covered the entire MERN stack and beyond. Throughout the program, I successfully built several projects from scratch, focusing on clean and organized code principles. Additionally, I gained experience in server-client communication and asynchronous data reception by effectively integrating and communicating with various external APIs.

B.A Interactive communication, IDC Herzliya

My BA in communication provided me with a strong foundation in user experience, user psychology, and product management. I have practical experience in UX design for mobile, web, and VR platforms.

Skills and Tools:

Client side – JavaScript, TypeScript, React, React Hooks, Redux, Vue, Vuex, CSS, SCSS, Material UI, Tailwind, Stencil, Turborepo, NX, Playwright, WEB API.

Server side – Nodejs, Express, Python, Django, REST API, MongoDB, MySQL.

Tools – GIT, Bitbucket, Heroku, Postman, MongoDB compass, VS code, Pycharm.
